# Jirah T. Nidoy

La Trinidad, Benguet | 09634034771 | jirah.nidoy@gmail.com

Newly graduated with a Bachelor of Science in Information Technology, with practical experience in web development, database management, and applied machine learning from hands-on projects and IT support work. Adaptable and eager to grow within a development team.

## EDUCATION

**STI College Baguio** #1 Private Road, New Lucban, Baguio City, 2600
*Bachelor of Science in Information Technology* *Aug. 2023 – Jun. 2027*

## EXPERIENCE

**Assitant I.T. Specialist** May 2022 – Nov. 2023
*E-Precision*

- Updated and maintained CRM records to keep customers and sales data accurate and current.
- Performed basic programming tasks to support internal tools and workflows.
- Monitored inventory sales and quota tracking to support day-to-day business operations.

## PROJECTS

**SENYASK - Lead Developer** May 2026 – Nov. 2026
*Filipino Sign Language (FSL) recognition web app - Capstone Project*

- Led development of the AI recognition pipeline, using a Random Forest/Extra Tress classifier trained on a 141-value statistical feature vector derived from MediaPipe landmarks.
- Built a Smart Sentence feature that composes signed gloss sequences into natural sentences via the Gemini API (proxied through a Cloudflare Worker), with a rule-based fallback for reliability.
- Implemented feature extraction in both Python and JavaScript for consistency across the stack.
- Built on a React/Vite frontend with Firebase for authentication, Firestore, and hosting.
- Designed device-agnostic handling (time-based sliding windows, aspect-ratio center-cropping).

**Kiosk System - Lead Developer** Sep. 2025 – Nov. 2025
*Coursework project*

- Designed and developed a self-service kiosk system covering both the customer-facing ordering interface and the cashier-end management interface.
- Built the customer-end for browsing items and placing orders, and the cashier-end for processing and managing incoming transactions.
- Used MySQL for data storage and management.

## SKILLS

- Programming Languages: Python, Java, JavaScript, Visual Basic
- Web & Frontend: React, Vite, Razor (ASP.NET)
- Data & Machine Learning: classical ML classifiers (Extra Trees/Random Forest), client-side/in-browser ML, MediaPipe, Gemini API
- Tools & Platforms: Firebase (Auth/Firestore/Hosting), MySQL, Cloudflare Workers, Git/Github, CRM Systems, networking fundamentals (CCNA)
- Professional: inventory & sales monitoring, basic technical troubleshooting, cross-functional collaboration on a capstone team.

## CERTIFICATIONS & ACTIVITIES

- CCNAv7 Completion
- Hack4Gov 2025 Regionals
- TNT CodeFest participant (Local)
- Filipino Brand of Service Excellence
